INDIVIDUAL VESSEL MANAGEMENT

Ability to slide bandwidth allocation between operational and crew welfare dependent on mission requirements

FLEET WIDE SATELLITE SERVICE MANAGEMENT

Allows real time monitoring of bandwidth across the fleet:

- Increase and decrease of vessel bandwidth as required across fleet
- Access and monitor throughput
- Independent reallocation of resources and connection of terminals

OPERATIONAL

Operational Data

Communication link

Network access

Corporate email

(O)

Weather forecasts

Mapping information Foreign Port Access

300% increase in bandwidth & data

throughput

70% reduction in escalating operating costs to family & friends

Social apps

Streaming services
